Create an app

✕ Cancel

What do you want your app to do?
Use cases are made up of permissions, products and features.

Each option unlocks related use cases. You'll configure and customize these use cases once your app is created.

Allow people to log in with their Facebook account
Our most common use case. A secure, fast, and convenient way for users to log into your app, and for your app to ask users for permission to access their data.

Get gaming login and request data from players
Give players a way to log into your game across multiple platforms and ask users for permission to access player data. Players can use custom player names and avatars. To create an Instant Games app, select Other below and select Instant Games.

Looking for something else?
If you need something that isn't shown above, you can see more options by selecting Other.

Other
Explore other products and data permissions such as ads management, Instant Games and more. You'll be asked to select an app type and then you can add the permissions and products you need.

Details

Select an app type

The app type can't be changed after your app is created. Learn more

Business
Create or manage business assets like Pages, Events, Groups, Ads, Messenger, WhatsApp, and Instagram Graph API using the available business permissions, features and products.

Consumer
Connect consumer products and permissions, like Facebook Login and Instagram Basic Display to your app.

Instant Games
Create an HTML5 game hosted on Facebook.

Gaming
Connect an off-platform game to Facebook Login.

Workplace
Create enterprise tools for Workplace from Meta.

Academic research
Connect to Facebook data and tooling to perform research on Facebook.

None
Create an app with combinations of consumer and business permissions and products.

Add an app name

This is the app name that will show on your My Apps page and associated with your app ID. You can change the name later in Settings.

dummy app name   14/30

App contact email

This is the email address we'll use to contact you about your app. Make sure it is an address you check regularly. We may contact you about policies, app restrictions or recovery if your app is deleted or compromised.

Business Account · Optional

Connecting a Business Account to your app is only required for certain products and permissions. You'll be asked to connect a Business Account when you request access to those products and permissions.

No Business Manager account selected ▾

By proceeding, you agree to the Meta Platform Terms and Developer Policies.   Previous   Create app
